SUMMARY

Full-stack developer with 3+ years shipping production web applications, CMS platforms, and AI automation for paying clients. Sole developer and client contact on Shopify, HubSpot, WordPress, and Contentful builds, owning scoping through frontend, backend, technical SEO, CI, QA, launch, and handoff. Builds LLM content pipelines with human-in-the-loop editorial review, plus agentic tooling on the Claude API and local inference.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5/CSS3/Sass; React, Next.js, React Native, Redux, Figma handoff

Backend & Data: Node.js, Express, FastAPI, REST API design and integration; PostgreSQL, MySQL, MongoDB, Redis

CMS & SEO: Shopify (Liquid, custom themes, apps), HubSpot CMS (HubL, CRM config), WordPress, Contentful, headless architecture; Core Web Vitals, JSON-LD, Search Console / Analytics

AI & Automation: Claude API, agentic and multi-agent architecture, local LLM inference (Ollama), structured JSON output, prompt engineering, Model Context Protocol (MCP); Claude Code and Codex for implementation and testing

Infrastructure & CI/CD: Docker, nginx, AWS, Azure, Linux, Git, GitHub Actions, Jest, Playwright, Agile/Scrum

SOFTWARE DEVELOPMENT EXPERIENCE

Full-Stack Developer (Contract) | Atelier Dacko, Toronto, ON

Apr 2023 – Present

- Sole developer and client contact for a custom jewelry brand's move into e-commerce: migrated the site, catalog, URL redirects, and AWS-hosted media from WordPress to Shopify with no loss of search visibility, then launched a 16-page storefront on a customized Dawn 2.0 theme in Liquid.
- Built an LLM content pipeline that drafts product descriptions and content briefs for editorial review, then audits published output and scores it against target keywords, cutting drafting from 30 minutes to 5 across a 200+ product catalog.
- Own ongoing content operations and on-page technical SEO across the store, tracked through Google Search Console, Analytics, and Ads. Organic blog traffic up 30%.
- Building an interactive ring-builder configurator (stone, band, size) to replace a manual quote workflow costing roughly two weeks of consultation per custom order.

HubSpot CMS Developer (Contract) | Neurative AI, Toronto, ON

Jan 2026 – Apr 2026

- Built a custom 8-page HubSpot CMS site from Figma designs with reusable, editor-configurable HubL modules and templates, letting the marketing team manage content without developer involvement.
- Cut page load time 30% and raised PageSpeed scores above 90 through image optimization, lazy loading, and caching, improving Core Web Vitals and organic search performance.
- Set up a GitHub Actions CI pipeline with automated linting, configured HubSpot CRM roles and permissions, and ran a month of post-launch QA through to a clean handoff. Fixed-term contract completed on schedule.

Shopify Developer (Contract) | Geeked Out Goods, Toronto, ON

Jan 2024 – May 2024

- Built Python pipelines for bulk product uploads, sanitizing and schema-checking CSV inventory exports before Shopify import across a 400+ item vintage gaming catalog; validating at ingest stopped malformed feeds from reaching the live store.

ADDITIONAL EXPERIENCE

Sous Chef & Team Lead | JOEY Restaurant Group and independent venues, Toronto, ON

Feb 2015 – Nov 2025

- Led kitchen teams of 5–20 over ten years: hiring, training, scheduling, and food-cost budgeting. Ran concurrently with the diploma and contract development work above from 2021 onward.

PROJECTS

Jobhunt | Local-First AI Job-Search Automation CLI | github.com/SimBuds/Jobhunt

Stack: Python, asyncio, Typer, Pydantic, SQLite, Ollama, Playwright, pytest, ruff, mypy, public ATS APIs

- Aggregates nine public ATS APIs concurrently over async HTTP with per-source rate limiting (Greenhouse, Lever, Ashby, Workday, SmartRecruiters, Workable, Recuitee, Adzuna, Job Bank Canada), with durable SQLite state and versioned migrations.
- Fit scoring, resume tailoring, and cover-letter drafting run locally on a quantized model through Ollama with schema-constrained JSON output; deterministic post-decode checks reject any claim not present in a verified profile snapshot. Playwright autofill stops before submitting. Roughly 700 tests with ruff and strict mypy gate every change. In daily use.

EDUCATION & CERTIFICATIONS

Advanced Diploma, Computer Programming & Analysis | George Brown Polytechnic | Sept 2021 – Apr 2024 | Dean's List, all terms

Contentful Certified Professional + Personalization Skill Badge | Oct 2025
