SUMMARY

Full-Stack Developer (Contentful Certified Professional) with 3+ years of independent client delivery across Shopify, HubSpot, and Contentful, building CMS templates, e-commerce workflows, and integrations in TypeScript, React, Node, and Python. Ships applied-AI tooling in client and personal work: LLM content pipelines with human review and local-inference automation on Ollama and the Claude API.

TECHNICAL SKILLS

CMS & E-Commerce: Shopify (Liquid), HubSpot CMS (HubL), WordPress (Elementor, PHP), Contentful (Certified Professional), Technical SEO (Core Web Vitals), Google Tag Manager

Core: JavaScript (ES6+), TypeScript, React, Next.js, Node.js, Express, HTML5, CSS3, Sass, RESTful APIs, Figma

Data & DevOps: MongoDB, MySQL, PostgreSQL, Docker, Git, GitHub Actions CI/CD, Jest, Playwright, Python, AWS, Azure

AI & Tooling: Ollama (local LLM hosting), Claude API, MCP (Model Context Protocol) Servers, prompt engineering, schema-constrained JSON output, Claude Code

Project Stack: FastAPI, Redis, Postgres, Docker Compose, JSON-LD, Astro, agentic architecture

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Atelier Dacko, Custom Jewelry Brand (Apr 2023 - Present)

- Redesigned the brand's WordPress portfolio in Elementor, then migrated the site, catalog, redirects, and AWS-hosted media to Shopify with no loss of search visibility.
- Built and launched a 16+ page Shopify storefront on a customized Dawn 2.0 theme in Liquid as sole developer and client contact; own content ops and technical SEO, organic blog traffic up 30%.
- Built an LLM content pipeline that drafts product descriptions and briefs for editorial review, then audits published output against target keywords. Cut drafting from 30 minutes to 5 across 200+ products.
- Building an interactive ring-builder configurator (stone, band, size) to replace a manual quote workflow costing ~2 weeks of consultation per custom order. In active development.

HubSpot CMS Developer | Neurative AI, SEO Marketing Brand (Jan 2026 - Apr 2026)

- Turned Figma designs into a custom 8-page HubSpot site, building reusable, editor-configurable HubL modules and page templates; configured CRM roles, launched, and ran a month of QA to a clean handoff.
- Cut page load time 30% and lifted PageSpeed above 90 through image optimization, lazy loading, and caching, improving Core Web Vitals and search rankings.

Sous Chef & Team Lead | Multiple Venues, Toronto (Feb 2015 - Nov 2025)

- Led teams of 5-20: hiring, training, scheduling, and food-cost budgeting, concurrent with my diploma.

Shopify Developer | Geeked Out Goods, Vintage Gaming (Jan 2024 - May 2024)

- Managed catalog for a 400+ item Shopify store; built a Python pipeline to validate CSV exports.

PROJECTS

Jobhunt - Local-First Job-Search Automation | github.com/SimBuds/Jobhunt

- Python CLI ingesting nine public ATS APIs over async, rate-limited HTTP into SQLite. Scoring and drafting run locally via Ollama with schema-constrained JSON; deterministic checks reject unverified claims. 1,138 tests.

Everything4Cats - WordPress Affiliate Site & Server Build | everything4cats.ca

- Live site I build, host, and run content and SEO on. An idempotent Bash provisioner takes bare Ubuntu to a WordPress host on AWS Lightsail, proven in a throwaway container. Custom theme and compliance plugin.

CERTIFICATIONS & EDUCATION

Contentful Certified Professional + Personalization Badge (Oct 2025) | Computer Programming & Analysis (Advanced Diploma), George Brown Polytechnic, 2021-2024. Dean's List, all terms.

Coursework: Machine Learning, Data Structures & Algorithms, Full-Stack Development.
