SUMMARY

Full-stack CMS developer with 3+ years shipping production Shopify, HubSpot, WordPress, and Contentful builds as the sole developer and client contact — owning scoping through frontend, backend, technical SEO, CI, QA, launch, and handoff. Builds human-in-the-loop LLM content pipelines and agentic tooling on the Claude API and local inference, with measured gains in content operations, site performance, and data quality.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), TypeScript, Python, PHP, HTML5/CSS3/Sass; React, Next.js, React Native, Redux

Backend & Data: Node.js, Express, FastAPI, REST APIs, PostgreSQL, MySQL, MongoDB, Redis

CMS & SEO: Shopify (Liquid), HubSpot CMS (HubL), WordPress, Contentful, Core Web Vitals, JSON-LD, Search Console / Analytics

AI & Automation: Claude API, Ollama, Model Context Protocol, structured LLM outputs, human-in-the-loop workflows

Infrastructure & CI/CD: Docker, nginx, AWS, Linux, Git, GitHub Actions, Jest, Playwright

SOFTWARE DEVELOPMENT EXPERIENCE

Full-Stack Developer (Contract) | Atelier Dacko, Toronto, ON | Apr 2023 – Present

- Sole developer and client contact for a custom jewelry brand's move into e-commerce: launched a 16-page Shopify storefront on a customized Dawn 2.0 theme in Liquid, replacing the brand's WordPress site.
- Preserved indexed URLs and baseline organic traffic through the WordPress-to-Shopify migration via full redirect mapping, metadata and catalog migration, AWS-hosted media cutover, and post-launch Google Search Console monitoring.
- Built an LLM content pipeline that drafts product descriptions and content briefs for review by the client's editorial team, then audits published output and scores it against target keywords, cutting drafting time by roughly 80% across the product catalogue.
- Own ongoing content operations and on-page technical SEO in collaboration with the client's marketing team, using Google Search Console, Analytics, and Ads to guide improvements. Increased organic blog traffic 30% year over year.

HubSpot CMS Developer (Contract) | Neurative AI, Toronto, ON | Jan 2026 – Apr 2026

- Partnered with the in-house design and marketing teams to build a custom 8-page HubSpot CMS site, translating their Figma designs into reusable, editor-configurable HubL modules and templates that let marketers manage content without developer involvement.
- Cut page load time 30% and raised PageSpeed scores above 90 through image optimization, lazy loading, and caching, improving Core Web Vitals and organic search performance.
- Set up a GitHub Actions CI pipeline with automated linting, configured HubSpot CRM roles and permissions, and ran a month of post-launch QA through to a clean handoff. Fixed-term contract completed on schedule.

Shopify Developer (Contract) | Geeked Out Goods, Toronto, ON | Jan 2024 – May 2024

- Built Python pipelines for bulk product uploads, sanitizing and schema-checking CSV inventory exports before Shopify import across a 400+ item vintage gaming catalog; validating at ingest stopped malformed feeds from reaching the live store.
- Integrated third-party Shopify apps and the Shopify Admin API into the store's workflows, automating inventory and product updates that had previously been handled by hand.

PROJECTS

Jobhunt | Local-First AI Job-Search Automation CLI | github.com/SimBuds/Jobhunt

Stack: Python, SQLite, Ollama, Playwright, pytest, ruff, public ATS APIs

- Local-first workflow engine integrating nine public ATS APIs (Greenhouse, Lever, Ashby, Workday, SmartRecruiters, Workable, Recrutee, Adzuna, Job Bank Canada) through asynchronous, rate-limited adapters, with durable SQLite state and versioned migrations.
- Fit scoring and document drafting run locally on a quantized model through Ollama with schema-constrained JSON output; deterministic post-decode checks reject any claim not present in a verified profile snapshot, and Playwright automation always stops before submission for human review. Roughly 700 tests with ruff and strict mypy gate every change. In daily use.

EDUCATION & CERTIFICATIONS

Advanced Diploma, Computer Programming & Analysis | George Brown Polytechnic | Sept 2021 – Apr 2024 | Dean's List, all terms

Contentful Certified Professional + Personalization Skill Badge | Oct 2025

ADDITIONAL EXPERIENCE

Sous Chef & Team Lead | JOEY Restaurant Group and independent venues, Toronto, ON | Feb 2015 – Nov 2025

- Led kitchen teams of 5–20 over ten years: hiring, training, scheduling, and food-cost budgeting. Ran concurrently with the diploma and contract development work above from 2021 onward.
