Professional Summary:

Full-stack developer specializing in JavaScript, React.js, Node.js, and API-driven architectures. Skilled in building responsive web applications, deploying cloud-based solutions, and integrating complex workflows through third-party REST APIs. Certified Contentful Professional with expertise in Headless CMS, Personalization, and A/B Testing. Experienced in delivering scalable applications using React.js, Node.js, and cloud-native deployment workflows.

Core Skills:

Front-End: React.js, JavaScript, TypeScript, HTML5, CSS3

Back-End: Node.js, Express.js, Java, Spring Boot, Python

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git/GitHub, Docker, AWS, Azure, Contentful, Ninetailed, Salesforce

Concepts: CI/CD, Headless CMS, Personalization, API Integration, Agile/SCRUM

Work Experience:

Freelance Software Developer — Self-Employed

2024 – Present

- Designed and deployed responsive full-stack applications using **React.js**, **Node.js**, **WordPress**, and **Shopify**, improving site load speed by **30%**
- Automated workflows such as **inventory syncing**, **order processing**, and **analytics tracking** by integrating third-party **REST APIs** (payments, shipping, CRM), reducing manual processes by **10–20 hours per month**
- Built **Dockerized environments** and implemented **CI/CD pipelines** (GitHub Actions) for fast, reliable deployments across cloud platforms including **AWS** and **Azure**
- Provided ongoing **technical consulting**, SEO enhancements, performance optimization, and platform monitoring to support long-term client growth

Leadership Experience — Team Lead (Culinary Operations)

2015 – 2024

- Led high-performing teams in fast-paced environments, developing strengths in communication, coaching, and operational efficiency
- Applied workflow optimization and process improvement principles later used in software project planning and Agile collaboration

Certifications:

- **Contentful Certified Professional** – Contentful (Issued: October 2025)
- **Contentful Verified Skill Badge: Personalization** – Contentful (Issued: October 2025)

Education:

Computer Programming and Analysis

George Brown College — Toronto, ON

Apr 2024

- Dean's List (all terms)
- Coursework: Machine Learning (Python, scikit-learn), Data Structures & Algorithms, Enterprise Java, ASP.NET, Full-Stack Applications

Technical Projects:

Menu Master Restaurant Management System — React, Rust (Rocket), MongoDB, Docker

- Built a responsive React front end integrated with a Rust API for inventory and sales management
- Collaborated with stakeholders in agile sprints to refine features and deliver iterative improvements

Employee Dashboard (MERN) — React, Node.js, Express, MongoDB, Docker

- Developed RESTful APIs and backend logic to track employee data and performance analytics
- Improved CI/CD workflows, reducing deployment errors by 30%

Tic-Tac-Toe AI (Minimax) — Java, JavaFX

- Implemented an unbeatable AI using Minimax with pruning optimization
- Applied decision-tree analysis and predictive modeling techniques
