

CASEY HSU

Full Stack Developer | Software Engineer | CMS & E-Commerce

Toronto, ON, Canada | casey-hsu@outlook.com

linkedin.com/in/casey-hsu | caseyhsu.com | github.com/SimBuds

SUMMARY

Full-stack CMS developer with 3+ years shipping production Shopify, HubSpot, WordPress, and Contentful builds as the sole developer and client contact. Owned scoping through frontend, backend, technical SEO, CI, QA, launch, and handoff. Builds human-in-the-loop LLM content pipelines and agentic tooling on the Claude API and local inference, with measured gains in content operations, site performance, and data quality.

TECHNICAL SKILLS

CMS & E-Commerce: Shopify (Liquid), HubSpot CMS (HubL), WordPress, Contentful, Shopify Admin API

Technical SEO: Core Web Vitals, PageSpeed optimization, redirect mapping, JSON-LD, Search Console / Analytics, Google Tag Manager (GTM)

AI & Automation: Claude API, llama.cpp (llama-server), structured LLM outputs, prompt engineering, GPU optimization, agentic architecture, human-in-the-loop workflows

Languages: Python, JavaScript (ES6+), TypeScript, PHP, HTML5/CSS3/Sass, React, Next.js

Backend, Data & CI/CD: Node.js, REST APIs, PostgreSQL, MySQL, SQLite, Docker, Git, GitHub Actions, Playwright, AWS, Azure, Linux, Bash

Coursework & Academic Projects: Java, Spring Boot, Angular, Agile/Scrum, headless architecture

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Contract) | Atelier Dacko, Toronto, ON | Apr 2023 – Present

- Sole developer and client contact for a jewelry brand's e-commerce launch: a 16-page Shopify storefront on a customized Dawn 2.0 theme in Liquid, replacing its WordPress site.
- Preserved indexed URLs and organic traffic through the WordPress-to-Shopify migration: redirect mapping, catalog and metadata migration, AWS media cutover, Search Console monitoring.
- Built a human-in-the-loop LLM content pipeline that drafts product descriptions and briefs for editorial review, then audits published output against target keywords, cutting drafting time from 30 minutes to 5 across a 200+ product catalog.
- Own ongoing content operations and on-page technical SEO with the client's marketing team, using Search Console, Analytics, and Ads; increased organic blog traffic 30% year over year.

HubSpot CMS Developer (Contract) | Neurative AI, Toronto, ON | Jan 2026 – Apr 2026

- Built a custom 8-page HubSpot CMS site from the in-house team's Figma designs, as reusable, editor-configurable HubL modules and templates marketers manage without a developer.
- Cut page load time 30% and raised PageSpeed above 90 through image optimization, lazy loading, and caching, improving Core Web Vitals and search performance.
- Set up a GitHub Actions CI pipeline with automated linting, configured HubSpot CRM roles and permissions, and ran a month of post-launch QA to a clean handoff.

Shopify Developer (Contract) | Geeked Out Goods, Toronto, ON | Jan 2024 – May 2024

- Built Python pipelines for bulk uploads, sanitizing and schema-checking CSV inventory exports before Shopify import across a 400+ item catalog; validation at ingest blocked malformed feeds.
- Integrated third-party Shopify apps and the Shopify Admin API into the store's workflows, automating inventory and product updates previously handled by hand.

PROJECTS

Jobhunt | Local-First AI Job-Search Automation CLI | github.com/SimBuds/Jobhunt

Stack: Python, SQLite, llama.cpp, Playwright, pytest, ruff, public ATS APIs

- Local-first engine integrating nine public ATS APIs (Greenhouse, Lever, Ashby, Workday, SmartRecruiters, Workable, Recuitee, Adzuna, Job Bank Canada) via async, rate-limited adapters with durable SQLite state.
- Scoring and drafting run locally on a quantized model via a llama.cpp server with schema-constrained JSON; post-decode checks reject any claim absent from a verified snapshot, and Playwright stops before submission. 1,200+ tests, ruff and strict mypy.

Everything4Cats | WordPress Affiliate Site & Server Build | everything4cats.ca

Stack: WordPress, PHP, AWS Lightsail, Ubuntu, Bash, Docker, WP-CLI, Apache

- Self-hosted live affiliate site with ongoing technical SEO. Bash scripts and Docker stand up the local dev environment; the AWS Ubuntu 24.04 host, WordPress install, and plugins are all self-managed.

EDUCATION & CERTIFICATIONS

Advanced Diploma, Computer Programming & Analysis | George Brown Polytechnic | Sep 2021 – Apr 2024 | Dean's List, all terms

Contentful Certified Professional + Personalization Skill Badge | Oct 2025

ADDITIONAL EXPERIENCE

Sous Chef & Team Lead | JOEY Restaurant Group and independent venues, Toronto, ON | Feb 2015 – Nov 2025

- Led kitchen teams of 5–20 over ten years, with responsibility for hiring, training, scheduling, and food-cost budgeting. Ran concurrently with the diploma and contract work from 2021.
