Summary

Full-stack developer since 2022, building Shopify, HubSpot and WordPress sites for small brands. Plans migrations to protect search traffic and automates content work with local LLMs.

Experience

Full-Stack Developer | Apr 2023 – Present
Atelier Dacko | Toronto, ON | Sole developer for a custom jewelry brand

- Launched the Shopify store in 2026, sharing one domain with WordPress via a Cloudflare Worker.
- Grew Google search impressions 78% in six months with on-page SEO and the marketing team.
- Cut product copy drafting from 30 to 5 minutes (200+ products) with a local LLM and Claude Code.
- Planned the Shopify move in three releases, with 7 launch gates and 10 architecture decisions.
- Built the custom Shopify theme on Dawn (Liquid), with automated checks on every commit.
- Redesigned and maintained the brand's WordPress site, including WP-CLI, backups and updates.
- Managed the ring builder vendor (VDB) through 24 logged technical questions.

HubSpot CMS Developer (Contract) | Jan 2026 – Apr 2026
Neurative AI | Toronto, ON

- Built a Marketplace-standard HubSpot theme with 22 reusable modules from in-house Figma designs.
- Optimized it for speed and WCAG 2.1 AA accessibility, and integrated HubSpot CRM.
- Owned all HubSpot work and ran full QA with a second developer through pull-request review.

Shopify Developer (Contract) | Jan 2022 – May 2023
Geeked Out Goods | Toronto, ON

- Wrote Python checks that kept malformed CSV rows out of a 400+ item catalog.
- Automated inventory and product updates with third-party apps and the Shopify Admin API.
- Shipped store changes alongside other developers through pull-request reviews.
